CROSSCLIPS WITH 4-POINT FASTENING ON GRATINGS FOR OUTDOOR FLOORS AND STAIRS
THE ONLY CLIP CAPABLE OF CREATING TACTILE PATHWAYS FOR THE VISUALLY IMPAIRED ON LARGE GRATED SURFACES

TECHNICAL FEATURES

Larger contact surface

Drivable

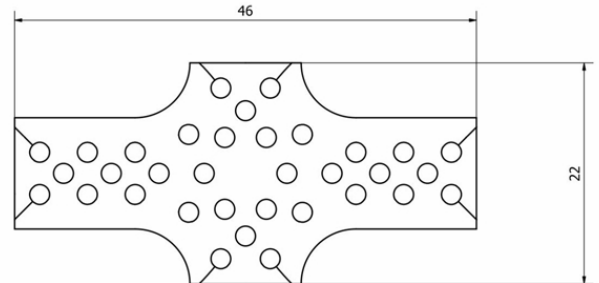

4-point manual interlocking fastening on bearing plate and connecting rod

Crossclips are made of polyurethane with enhanced resistance to oils and abrasion, impermeable to water and gas. Excellent elasticity and exceptional elongation ratio ensure durability and tear resistance.

Tested on a wet inclined surface with water, non-slip up to a 29-degree slope

Available in 2 colors: black and steel
BLACK: maximum visibility and safety
STEEL: color matches gratings, elegant, safe, non-slip

Suitable for all types of grating

Specially designed for
gratings walkable
from all directions

Easy and Economical Installation of Non-Slip Clips for Grated Floors and Stairs

The installation is very simple and interlocking; just manually press the clip onto the bearing surface of 2 - 3 - 4 - 5 mm thickness, and the connecting rod.

No protective measures are needed, only simple work gloves. No adhesives, screws, bolts, or maintenance are required. The quantity to be inserted, whether linearly or randomly, depends on the surface area of the grate.

They are fixed on the steps of external grated stairs and on walking surfaces according to the direction and traffic.
